丸池様 (Maruikesama)

Suguse Yuza Town

Administration: Mt. Chōkai Ōmonoimi-jinja Shrine, Conservation: Yuza Chōkai Tourism Association

Features

About 1.5km from Fukura Station on the JR Uetsu Main Line and next to Ushiwatarigawa River is Maruikesama pond, spanning a diameter of about 20m with a depth of 3.5m. The lake itself is the object of worship at Mt. Chōkai Ōmonoimi-jinja Shrine, and is known and revered by the public as “Maruikesama”. The water is sourced from the ground and not by other bodies of water, so it is exceptionally clear with cold temperatures. Even a fallen tree will be persevered without decaying in the water, which is a strange and mysterious azure blue color. Maruikesama is designated as a Yuza Town Natural Monument.

Access

(Lat. 39.072765°, Long. 139.891538°)

The hatchery for MINOWA Salmon Fishery Association is about 1.5km south from Fukura Station on the JR Uetsu Main Line. Park at the parking lot and head towards the promenade on foot, following the information board. Cross the stone bridge, head forward for a couple meters, and turn right to reach Maruikesama.

Please be considerate to the Fishery Association when parking.
